阿姆斯特丹自由大學人類運動科學系副教授及  
國際殘疾人奧委會視力障礙運動員級別鑑定研究與發展中心主任

David Mann is an Associate Professor of Human Movement Sciences at the Vrije Universiteit Amsterdam. He specialises in visual-motor expertise in sport: understanding the visual factors that differentiate expert athletes from others; using that to enhance the skill of developing athletes; and understanding the impact of vision loss on sport performance. He led one of the three IPC Classification Research and Development Centres established to enhance the quality of classification in para sports, specifically for developing new para sport classification systems for athletes with vision impairment.
